The following is an examiner's statement of reasons for allowance: The Gonzalez reference describes formation of a potato protein complex with carboxymethylcellulose (CMC), but CMC is not a "potato starch-complexing emulsifier" within the meaning of this application. 20030170363 describes recovery of glycolipids from potato wastewater (at [0050]) , but teaches doing so with silica or diatomaceous earth rather than with a potato-starch complexing emulsifier such as those listed in the specification.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:
